

# Nikhil Jain

Fernbach Postdoctoral Fellow, Center for Applied Scientific Computing  
Lawrence Livermore National Laboratory

Livermore, CA, 94551  
☎ 217.979.0918  
✉ [nikhil.jain@acm.org](mailto:nikhil.jain@acm.org)  
<http://nikhil-jain.github.io/>

---

## Education

- 2016 **Ph.D., Computer Science**, *University of Illinois at Urbana-Champaign*.  
*Optimization of Communication Intensive Applications on HPC Networks*. Advisor: Laxmikant V. Kale
- 2009 **M.Tech., Computer Science and Engineering**, *Indian Institute of Technology*, Kanpur, India.
- 2009 **B.Tech., Computer Science and Engineering**, *Indian Institute of Technology*, Kanpur, India.

---

## Awards & Honors

- 2017 NERSC Award for Innovative Use of HPC
- 2017 Finalist, 10th IEEE International Scalable Computing Challenge
- 2017 Best Poster Award (2nd Place), Computation Postdoc Poster Symposium, LLNL
- 2016 Fernbach Postdoctoral Fellowship
- 2014 IBM PhD Fellowship
- 2013 Silver Award, ACM Student Research Poster Competition, Supercomputing
- 2012 Best Poster, LLNL Annual Student Poster Session
- 2012 Co-winner of HPC Challenge Class 2 (performance), Charm++ Team, Supercomputing
- 2011 Andrew and Shana Laursen Fellowship, Department of Computer Science, UIUC

---

## Skills

- General C, C++, Fortran, Python, numpy, git, svn, CVS, autotools, CMake.
- Parallel Computing Parallel application development in MPI, OpenMP, and Charm++. Parallel runtime system development. Performance tool development in C/C++. MPI and Charm++ profiling tools. Measurement tools, analysis, and tuning of parallel applications on large clusters (IBM Blue Gene, Cray, Linux). Experience with large science codes at UIllinois.
- Networks and Communication HPC Network simulation tools. Communication and network modelling and analysis. Collective operations on large scale systems. Performance monitoring of networks.

---

## Research and Work Experience

- 2016-present **Lawrence Livermore National Laboratory**, *Fernbach Postdoctoral Fellow*.
  - Research, characterize, and improve communication throughput of HPC networks.
  - Develop data analytics driven methods for performance optimization.
  - Explore new avenues for application of parallel computing.
- 2011-2016 **Dept of Computer Science, University of Illinois at Urbana-Champaign**, *Research Assistant*.
  - Created TraceR and contributed to CODES to enable scalable and accurate simulation of parallel codes on HPC networks.
  - Proposed DamselFly - a fast analytical model for understanding performance of dragonfly networks.
  - Developed new features for Charm++, a widely used parallel programming model.
  - Contributed to development and performance improvements in OpenAtom and NAMD.
- Summer 2014 **Lawrence Livermore National Laboratory**, *Research Intern*.  
Analyzed prediction models to identify factors that affect performance on HPC networks.
- Summer 2012 **Lawrence Livermore National Laboratory**, *Research Intern*.  
Proposed and demonstrated use of machine learning based models for predicting communication performance of HPC applications.

- Spring 2011 **Dept of Computer Science, University of Illinois at Urbana-Champaign, *Visiting Scholar.***  
Re-designed runtime-level memory management module for speed and efficiency in Charm++.
- 2009-2011 **IBM Research, India, *Blue Scholar.***  
Developed 3× faster topology-aware algorithms for collective communication on Blue Gene systems.
- Summer 2007 **Polytechnic Institute of NYU, *Undergraduate Research Intern.***  
Investigated use of obfuscation methods in logic design.

---

## Teaching Experience

- Fall 2014 **Teaching Assistant, *Ullinois Urbana-Champaign,*** Conducted discussion hours, and designed lectures, homework assignments, and exams for Introduction to Parallel Programming.
- Spring 2009 **Teaching Assistant, *IIT Kanpur,*** Conducted discussion hours and coding sessions for Fundamental of Computing.
- Fall 2008 **Teaching Assistant, *IIT Kanpur,*** Conducted discussion hours and coding sessions for Fundamental of Computing.

---

## Research and Other Funding

- 2017-present **Co-I, *ECP Proxy Applications Project,*** \$2,000,000/year.  
PI: David Richards, LLNL. DOE ECP (website)
- 2017-present **Co-I, *Workload-driven Design Space Exploration,*** \$500,000/year.  
PI: Martin Schulz, LLNL. DOE ECP Hardware Technologies.
- 2016-present **Co-I, *Statistical Methods for Exascale Performance Modeling,*** \$2,500,000.  
PI: Todd Gamblin, U.S. Department of Energy (DOE) Early Career Research Program.
- 2016 **Co-I, *Exploring Asynchronous Task-based Models and Runtimes in WSC Codes,*** \$50,000.  
PI: Abhinav Bhatele, Linking Exploratory Application Research to Next-gen development (LEARN) program.

---

## Mentoring/Co-advising

- Students Kevin Brown (Tokyo Tech), Emilio Castillo (BSC), Vanessa Cedeno (Virginia Tech), Aditya Nigam (IIT Kanpur), Samuel Pollard (UOregon), Alexander Robey (Swarthmore), Karthik Senthil (Illinois), Palash Sharma (IIT Kanpur), Staci Smith (Arizona), Rahul Sridhar (UC Irvine), Ankit Srivastava (Georgia Tech), Andrew R. Titus (MIT), Tao Wang (NC State)

---

## Committees

- Technical Program Committees COMHPC '16, Cluster '17, HPC Asia '18, IPDPS '18, PMBS '17, SC '18, SCSC '16 '17, Supercomputing Asia '18
- Grant Review Committees DOE Small Business Innovation Research (SBIR) 2016.
- Other Reviewing TPDS, IJHPCA, JPDC, Biophysical, PACT '17, IPDPS '14 '17, Cluster '12

---

## Software Projects

- traceR Trace-driven PDES-based network simulation of parallel applications.
- Damselfly Analytical modeling of steady-state traffic flow on dragonfly networks.
- bgqnc1 An easy interface for network counters collection on BlueGene/Q systems.
- LeanMD A mini-application for exploring optimizations for molecular dynamics.
- topoAPI Fully-automated profiling, analysis, and mapping on HPC systems.
- Charm-ROSS Charm++ based implementation of the parallel discrete event simulator ROSS.
- [Open-source software I contribute to](#)
- CODES Packet-level HPC network simulation.
- Charm++ Object-based message driven parallel programming paradigm.

|              |  |
|--------------|--|
| OpenAtom     | Scalable Ab-Initio Molecular Dynamics with diverse features.     |
| EpiSimdemics | Hybrid contagion modeling using Charm++.                         |
| ROSS         | Scalable parallel discrete simulation with optimistic execution. |
| NAMD         | Highly scalable parallel molecular dynamics.                     |
